AI Cut & Create Sprint

for focus

Helping teams identify what to stop doing or hand to AI (the Cut) and what new, higher value work to start (the Create).

AUDIENCE	FORMAT	CLASS SIZE
Managers, team leads, and specialists	3.5 to 4 hours. In person or online.	8 to 20 people

What you will do

For teams ready to move beyond general AI skills into focused action. This session pairs two structured exercises using CoachBay's original canvas tools. The 9R Deletion Audit helps teams identify recurring work to retire or hand to AI. The 9P Digital Project Canvas helps teams define new, higher value work to start. Together, they ensure AI adoption is not just about efficiency but about building something new.

After this, you can

- Complete a Deletion Audit using the 9R Canvas to identify specific work your team should stop doing or hand to AI, from routine reports to approval bottlenecks.
- Scope a new initiative using the 9P Digital Project Canvas, starting with the person and the problem before jumping to solutions.
- Connect the two sides: see how the time freed by the Cut directly fuels the Create, giving your team a clear before and after story.
- Build a practical action plan with owners, timelines, and a first checkpoint to keep momentum going after the session.

What you walk away with

- A completed 9R Deletion Audit with specific work items identified for AI handover.
- A completed 9P Digital Project Canvas with a new initiative scoped from person to prototype.
- Both sides of AI adoption in one session: stop and start with intention.
- Practical tools your team can reuse for every new AI initiative going forward.

Optional: Pit Stops

Each Sprint can be followed by two Pit Stops (1 hour each, max 6 people) to turn learning into lasting habits.
