AI Leadership Sprint

for leading

Helping senior managers build AI leadership habits that turn personal use into team wide impact.

AUDIENCE	FORMAT	CLASS SIZE
Senior managers and executives	3.5 to 4 hours. In person or online.	8 to 20 people

What you will do

For senior managers who need to move beyond personal AI use and start leading their teams into AI. This session holds up a mirror, then builds habits. You start with the AI Leader Assessment (26 questions, 6 dimensions) to see where you really stand. Then you work through the identity shift: from a leader who sometimes uses AI to an AI leader. Research shows that when leaders actively model AI use, team adoption jumps from 15% to 55%. The sprint includes a Three Buckets exercise for leaders and turns insights into a personal leadership contract.

After this, you can

- See your real AI leadership shape using the AI Leader Assessment (26 questions, 6 dimensions), so you know exactly where to focus.
- Make the identity shift from a leader who sometimes uses AI to an AI leader, and understand why this distinction matters for your team.
- Map your team's Three Buckets: what they should cut, what they should create, and what they should amplify, giving you a clear action plan.
- Build a personal AI operating model across five leadership areas, so AI becomes part of how you lead, not a separate initiative.
- Commit to three specific AI leadership habits for the next 90 days, with a personal leadership contract to keep you accountable.

What you walk away with

- AI Leader Assessment results showing your personal shape across 6 dimensions.
- A Three Buckets map: what your team should cut, create, and amplify.
- A personal AI operating model mapped to five leadership areas.
- Three committed AI leadership habits for the next 90 days.

Optional: Pit Stops

Each session can be followed by two Pit Stops (1 hour each, max 6 people) to turn learning into lasting habits.
