The 8 People in Every AI Rollout

Every organization has the same cast of characters when AI arrives. Knowing who is who is the first step to moving everyone forward. Where does each person on your team sit?

1 The Skeptic

Refuses to engage. Thinks AI is overhyped or dangerous. Will not try it until forced to.

2 The Anxious

Worried AI will take their job. Avoids the topic. Needs reassurance before they can learn.

3 The Coaster

Uses AI for basic tasks every day. Never pushes beyond the obvious. Comfortable, not growing.

4 The Overconfident

Had one good aha moment and now thinks they know AI. Dangerous because they do not know what they do not know.

5 The Gatekeeper

Uses AI but hides it. Keeps the advantage to themselves. Blocks team progress without realizing it.

6 The Tinkerer

Builds their own AI tools at home for fun. Often hidden from the organization. Huge untapped potential.

7 The Principled

Could use AI well but holds back on ethical grounds. Needs a framework, not a sales pitch.

8 The Fluent

Uses AI across their work. Shares wins. Keeps learning. The person you want everyone to become.

Can you name each one on your team?
